

REFILL INSTRUCTIONS FOR EPSON S020110 COLOR INK CARTRIDGE

EP700SPC PHOTO REFILL KIT

Refill Method

1. Cover ink port hole (must be dry) with tape as shown.
2. Locate the refill holes on top of cartridge. Use the drill tool, if necessary, to enlarge the hole.

Draw 3 - 5 ml(cc) ink into syringe from ink bottle and inject ink very slowly. Squeeze or shake the cartridge to make ink well saturated by sponge. Repeat for all five colors.

3. Use the round yellow seals to cover the ink ports after you have filled the chamber with ink. Make sure the port is dry before attaching the seal.
4. Reinstall cartridge and do the cleaning cycle at least 2 - 3 times.
